

Release 1.2

Do not use the SCAN TO CONFIG feature on earlier versions.

- Bug Fix: “Scan to configure” will no longer creates duplicate entries in Configuration.

Scanner Camera improvements.

- You can now aim without scanning by pressing and holding the SCAN button. The screen will be greyed over while aiming.
- If CAMERA,3 is set in the configuration, the Scanning mode can be switched from Barcode to OCR.

Touching the screen during scanning will switch modes

-In Barcode mode the target lines are RED.

-In OCR mode the target lines are Blue
