

Release 1.3

Auto Scaling feature added.

If the SCALE parameter is set to 0 (SCALE,0) then all other scaling (SCALEX,SCALEY) will be ignored.

This will attempt to make the best fit of the login and other screens.

Note: Previously this value was set to 172 and only affect the scaling of the Login Screen.

Release 1.2

Do not use the SCAN TO CONFIG feature on earlier versions.

- Bug Fix: "Scan to configure" will no longer creates duplicate entries in Configuration.

Scanner Camera improvements.

- You can now aim without scanning by pressing and holding the SCAN button. The screen will be greyed over while aiming.
- If CAMERA,3 is set in the configuration, the Scanning mode can be switched from Barcode to OCR.

Touching the screen during scanning will switch modes

-In Barcode mode the target lines are RED.

-In OCR mode the target lines are Blue
